

Getting Started

Introduction

Welcome to the Men & Mice Suite, a multi-user cross-platform DNS, DHCP, and IP address management system that allows you to manage servers on multiple platforms simultaneously.

The Men & Mice Suite consists of three types of components: Men & Mice Management Console and other user interfaces, Men & Mice Central, and the two server controllers, Men & Mice DNS Server Controller and Men & Mice DHCP Server Controller.

How does the Men & Mice Suite work?

The [Implementation guide](#) provides information about the function of each component in the Men & Mice Suite.

For detailed information regarding installing the Men & Mice Suite, please consult the [Installation guide](#).

Need more information?

Send us an email and tell us about your concerns. Click [here](#) for instructions on how to contact the Men & Mice support team.
