

High availability failure state

Message	<ul style="list-style-type: none">• HA cluster member <i><your server></i> is in a failed state.
Type	Warning
Description	This warning is shown when the active Central server went down and a standby Central server took over the service. For some reasons active server didn't report and therefore the standby server was activated. The Standby server is updated and becomes the active server and vice versa. The former active server will be in failed state until it is fixed or restarted.
