

Scope over utilized

Message	<ul style="list-style-type: none">• Static threshold set for the subnet <i><range name></i> has been reached.• Dynamic threshold set for the subnet <i><range name></i> has been reached.• Static threshold set for the subnet <i><range name></i> has been reached.• The threshold set for the super scope <i><super scope name></i> on server <i><server name></i> has been reached
Type	Warning
Description	This warning is shown when a specific threshold is reached, that is, not enough IP addresses is available in this range. To fix this issue remove the scope and create a larger one instead or create a super scope which will join together two or more scopes for larger one.
