

9.1.2

9.1.2

August 17th, 2018

Men & Mice announces the release of Version 9.1.2 of the Men & Mice Suite.

This is a maintenance release containing various fixes and improvements.

Bug fixes

- An issue was fixed in the new Web application which prevented users with SQL Server to use the reporting feature
- An issue was fixed in the new Web application where collapsing the filtering sidebar would clear the active filter
- An issue was fixed for the GetDNSRecords SOAP command where it was not possible to have a nullable targetRef
- An issue was fixed in the new Web application where DHCP leases would show up as Free

Improvements

- It is now possible to create and modify multiline TXT records in the web application
