

# 8.2.6

## 8.2.6

December 12<sup>th</sup>, 2017

Men & Mice announces the release of Version 8.2.6 of the Men & Mice Suite.

This is a maintenance release containing a few bug fixes and improvements

### Bug fixes

- An issue was fixed in the zone migration wizard where it would in some cases delete the history, properties and access rights of the original zone
- An issue was fixed in the Web UI where Host Editor didn't always allow "All" even when records were the same in both zone instances
- An issue was fixed where changing an IP address in A record inside a zone, the DNS names in the respective range did not get updated
- An issue was fixed where slave zones were not visible when there were master zones with the same name but in a different view.
