

6.8.2

6.8.2

July 7th 2015

Men & Mice Announces the release of version 6.8.2 of the Men & Mice Suite.

Updates and fixes in this release

- A vulnerability was found in the DNS server software for the DNS/DHCP appliances which has been patched and fixed. For details refer to CVE-2015-4620.
- A bug was fixed where a zone transfer was in some cases interrupted in a dynamic zone signed with TSIG.
